MISSION

As the premier credentialing organization for professions based on the science of protecting and enhancing the health, safety, and environment of people at work and in their communities, the American Board of Industrial Hygiene[®] serves its credentialed practitioners by establishing and administering a valid, reliable, and rigorous credentialing process to protect the public and meet the needs of employers.

VISION

ABIH[®]-credentialed practitioners will be globally recognized as the epitome of professional competence and ethics in professions based on the science of protecting and enhancing the health, safety, and environment of people at work and in their communities.

¹Certified Industrial Hygienist

²Certified Associate Industrial Hygienist

- CYZAP automation project (New applicants)
- Improved Credential Maintenance program
- New Product Stewardship credential (CPS)?
- Rebranding of the IH profession and name (Marketing RFP)
- Joint strategies with AIHA and other OEHS boards
- International strategies (India: Primary Focus)

Moving Forward Together...

The American Board of Industrial Hygiene® (ABIH®) and the Institute of Professional Environmental Practice® (IPEP®) are committed to building on their strengths as partners. Our credentialed practitioners are recognized by employers and colleagues for their high standards of education, practice and ethics. We invite you to stand out from the crowd by attaining credentials that demonstrate your qualifications for protecting people and the environment.

The Qualified Environmental Professional® (QEP®) is for environmental practitioners with demonstrated multi-media work experience, who have passed the General Environmental Science exam and the Qualified Environmental Professional exam, a rigorous evaluation of scientific knowledge and expertise in one of four selected areas: 1) Air Quality, 2) Water Quality, 3) Waste Management, or 4) Environmental Science, Management, and Policy. Individuals who pass must commit to on-going professional development and a code of ethical conduct. For more information or to apply, visit www.IPEP.org.

The Environmental Professional In-Training® (EPI®) exam is the first step to becoming a QEP. The EPI is an entry-level designation for environmental students about to graduate from a wide range of scientific and environmental management programs or for environmental professionals with less than 5 years of work experience. The EPI is granted after taking the General Environmental Science exam, which tests knowledge of general environmental science across 20 subject areas. EPI status expires after seven years and is not renewable. For more information or to apply, visit www.IPEP.org.

The Certified Industrial Hygienist® (CIH®) exam is the global standard for certification in industrial hygiene or occupational health. CIHs protect the health and safety of workers and the public by identifying and investigating chemical, physical, biological, or ergonomic hazards and suggesting plans to eliminate or minimize them. Practitioners must meet education and work-experience requirements to pass a rigorous exam, practice ethically, and keep their knowledge and skills up to date. For more information or to apply, visit www.ABIH.org.
